

Innovation Supports the Economy of Farmers

A workshop on 'Scientific Farming and Nursery Development' was organised on 31st January 2018 at TARAGram Pahuj, Jhansi, Uttar Pradesh. The objective was to build capacities of small and marginal farmers from the Scheduled Caste and Scheduled Tribe communities, to help enhance their income. It exposed the farmers to newer agricultural technologies and scientific farming methods, such as vegetable cultivation and its package of practices starting from nursery raising to harvesting. The workshop was conducted as an intensive nursery management training for 25 farmers from villages of Datia and Jhansi, which covered topics such as site selection, layout, pest and disease management, and sowing techniques.
