

Transforming Roads: The Journey of Md. Kasim and the Suhana Safar Program

On February 18th, a significant event occurred at Tuglakabad: the Suhana Safar Program's Depot intervention took centre stage. Since 2016, this initiative, spearheaded by Development Alternatives, has been a leading example of positive change in skilling supply chains. The training session covered a variety of crucial topics, including traffic rules, road safety, financial literacy, and government schemes.

Among the participants was Md. Kasim, a familiar face from Uttar Pradesh who had returned for his fourth visit. A truck driver for five years, Kasim reflected on how the program had enriched his life in many ways. Notably, he discovered the importance of nutritious food for truck drivers, a revelation he credited to the program's comprehensive approach. He also expressed appreciation for learning about various government schemes tailored to his benefit.

Kasim emphasized the program's engaging and educational nature, highlighting how each visit provided him with new insights and knowledge. From learning about managing road rage to understanding the nuances of financial planning, Kasim's experience demonstrated the positive impact of education and awareness.

The Suhana Safar Program continues to empower individuals like Md. Kasim, serving as a testament to the power of community-driven initiatives in shaping a better future for all. Through education and engagement, the program transforms roads beyond mere travel, paving the way for brighter tomorrows.
